MOMENTO — TECHNICAL OVERVIEW

Creator Ecosystem | Blockchain Monetization | AI-Powered Distribution

PLATFORM OVERVIEW

Momento is a location-based social platform where creators monetize through blockchain technology. Users discover creators nearby, follow their journey, and invest in their growth through creator tokens, prediction markets, and yield-bearing strategies. The platform uses AI to help creators distribute content across all social platforms and predict post performance before publishing. Built as a Turbo monorepo with a shared type system across a mobile app, API backend, and marketing site.

TECHNOLOGY STACK

LAYER	TECHNOLOGY	ADVANTAGE
Mobile	Expo 54, React Native 0.81, Expo Router, React Query	*Single codebase iOS + Android; OTA updates; offline-first*
Backend	Next.js 14 on Vercel (serverless), Prisma ORM	*Auto-scaling; type-safe DB; 26 endpoints with auth + caching*
Database	PostgreSQL + PostGIS on Supabase (8 models)	*Sub-100ms geo-lookups; spatial feed with auto-expanding radius*
Caching	Upstash Redis (serverless, location-quantized)	*~1km grid keys; 60s feed / 30s wallet / 300s profile TTLs*
Auth	Privy (Google OAuth + Solana wallets) + Veriff KYC	*Zero-friction wallet on signup; regulatory-ready verification*
Blockchain	Solana via Helius RPC + DAS; Jupiter v6; Meteora	*Sub-second finality; best-price routing; dynamic LP pools*
Storage	Supabase Storage + Expo Push (7 event types)	*Presigned uploads; fire-and-forget batched notifications*
AI (Planned)	pgvector embeddings, cross-platform agents	*Semantic search; auto-distribute to IG/TikTok/X/YouTube*
DeFi (Planned)	Kamino, Marinade (Solana) / Aave, Lido (ETH)	*Idle stablecoins earn yield; one-tap deposit/withdraw*

ARCHITECTURE HIGHLIGHTS

Smart Feed Ranking

5 configurable sort modes with weighted scoring (recency, engagement, proximity, following). Algorithm transparency modal shows users exactly how their feed is ranked — building trust through openness.

Location-First Discovery

PostGIS geography columns power spatial queries with auto-expanding radius. Location quantized to ~1km for cache efficiency. Users discover nearby creators organically — proximity is a first-class signal, not an afterthought.

Blockchain-Native Wallets

Every user has a real Solana wallet from first login via Privy — no seed phrases, no extensions. Balances update in real-time via Helius DAS. Portfolio snapshots enable historical charts. Ready for swaps and DeFi on day one.

AI-Ready Architecture

Feed ranking already uses configurable weight presets — the same pattern extends to ML personalization. Schema supports pgvector for semantic search. Modular hooks enable plug-in AI agents for cross-platform content distribution.

CREATOR ECOSYSTEM FEATURE-FOCUSED TECHNICAL ROADMAP

PLATFORM EVOLUTION & FUTURE UTILITY

● STATUS: DONE □	● STATUS: NOW □	● STATUS: NEXT □	● STATUS: FUTURE □	● STATUS: HORIZON □
AUDIENCE: 5 CREATORS	AUDIENCE: 10-15 CREATORS	AUDIENCE: 5-15 LAUNCHES	AUDIENCE: --	AUDIENCE: --
MVP FOUNDATION	**GROWTH & MONETIZATION**	**MASS ADOPTION**	**INTELLIGENT INSIGHTS**	**ECOSYSTEM UTILITY**
SECURE AUTHENTICATION (Wallet Connect, Privy OAuth)	FIAT ONRAMPING (Credit Card, Apple Pay)	APP STORES SUBMISSION (iOS & Google Play)	AI SEARCH & DISCOVERY (Semantic search capabilities)	YIELD VAULTS (Kamino/Aave DeFi integration)
CREATOR ACTIVITY FEED (Smart ranking, 5 sort modes)	TOKEN SWAPS & LIQUIDITY (Jupiter v6 DEX integration)	ENDPOINT HARDENING (Scaling & Security Audits)	CROSS-POSTING AGENTS (Social syndication logic)	DIGITAL COLLECTIBLES (NFT creation & display)
INTEGRATED WALLET & KYC (Veriff ID check, onboarding)	TOKEN CREATION STUDIO (No-code minting & raises)	SCALING INFRASTRUCTURE (Replicas, CDN, edge cache)	FEEDBACK ENGINE (User sentiment analysis)	TOKEN-GATED EVENTS (Digital/Physical ticketing)
ENGAGEMENT SYSTEM (Like, comment, follow, notifs)	SMART CONTRACTS (Revenue splitting, bonding)	CREATOR TOKEN LAUNCHPAD (Community sales & distribution)	CONTENT MODERATION (Automated safety checks)	PREDICTION MARKETS (Dynamic wagers & voting)
SEARCH & EXPLORE (Debounced, masonry, nearby)	FOLLOW ENHANCEMENTS (Feed, suggestions, discovery)		CREATOR INSIGHTS (Predictive performance models)	FEE SHARING (Revenue distribution mechanics)
MVP DETAIL (Auth, Feed, KYC, Wallet, 26 ENDPOINTS & 20 SCREENS)
